EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
Bachelor of Technology	Amrita Vishwa Vidyapeetham , Coimbatore	8.28/10	2020 - 2024
AISSCE	DAV Girls Sr. Sec. School (CBSE), Chennai-86	95.2%	2019 - 2020
AISSE	DAV Girls Sr. Sec. School (CBSE), Chennai-86	93.8%	2017 - 2018
Ba Hindi	Dakshin Bharat Hindi Prachar Sabha		2017

WORK EXPERIENCE

- HSBC TECHNOLOGY INDIA**

Software Engineer

July 2024 - present
Hyderabad , Telangana

 - Worked on full-stack development of a MERN-based application, improving frontend efficiency, form submissions, and standardizing table views.
 - Refactored the codebase to eliminate 216 high-severity SAST vulnerabilities and reduced backend calls to enhance security and performance.
 - Optimized data handling and field population logic, reducing user errors and streamlining end-user workflows.
 - Led end-to-end deployments and coordinated testing efforts, achieving 100% successful production rollouts.
 - Worked on production readiness for Spring Boot APIs, ensuring release compliance.
- Schneider Electric**

Intern

Jul 2023 - Sep 2023
Bengaluru, Karnataka

 - Developed and debugged controllers using C# within an ASP.NET Core backend project, improving functionality and reliability.
 - Implemented API documentation with Swagger, including custom endpoints and header-based inputs, to streamline API integration.

TECHNICAL SKILLS

- Languages:** Java, React JS, Node JS, Python, HTML, CSS, Javascript, PHP, SQL
- Tools/Packages:** NumPy, Scikit-learn, Swagger, Git, Jira, SonarQube

PROJECTS

- Automated ransomware mitigation using public repositories**

Supervisor/Guide: Dr. Gowtham Ramesh

Mar 2023 – Jul 2023

 - * Objective: Analysis of attacks to build a anti – malware software
 - * Role: Analysis of linkage between attacks, vulnerabilities and weaknesses
 - * Tools or techniques: Capec, Cwe, Cve
- Quiz Web Application**

Apr 2023 – Jun 2023

 - * Objective: Development of application for easy, efficient quiz conduction and taking up of quizzes.
 - * Role: Testing, Frontend Development
 - * Tools or techniques:HTML, CSS, PHP, Jira, SonarQube
 - * Outcome: Efficient management system for quizzes was developed.
- IOT based Smart Agriculture System**

Mar 2023 – Jun 2023

 - * Objective: Smart Agriculture system incorporating automated irrigation, farm fires detection and pest detection and insect breeding prediction.
 - * Role: Hardware configuration, Frontend design
 - * Tools or techniques: ESP32, Arduino application, sensors
 - * Outcome: Prototype that enhances farm productivity through automated irrigation systems and proactive monitoring for optimal soil moisture, water availability, fire detection, insect infestation check.
